Rafaël Ramírez

Rafaël has worked with scenarios & futures since 1980 and holds a PhD from the Wharton School. He was Visiting Professor of Scenarios & Corporate Strategy at Shell International 2000 - 2003, and in 2008 - 2010 Chairman of the World Economic Forum’s Global Agenda Council on Strategic Foresight. He directs the Oxford Scenarios Programme and is Fellow in Strategy at the Saïd Business School, and is Senior Research Fellow in Futures at the Oxford Martin School. Rafaël has worked in over 25 countries and has published 6 books, and scholarly papers in Futures, Harvard Business Review, Long Range Planning, Organization, Organizational Aesthetics, Organization Studies, and the Strategic Management Journal.

Riku Österman

Riku is a strategy practitioner with 15 years of experience in strategy and intelligence roles at Nokia and TeliaSonera, mostly in managerial positions. His genuine experience includes innovative scenario work, intelligence tools and methods, facilitated workshop techniques, corporate strategy round design and facilitation and integrated strategic management practice implementation. He holds an MSc in Industrial Management from Helsinki University of Technology.

Daniel Nordstad Grönquist

Daniel is Principal in Bekk Management Consulting in Norway and formerly held the position of Director of Strategy and Technology at NormannPartners. He has worked with strategy, innovation and IT development across a number of sectors and business cultures, including international growth environments. With a MSc in Computer Science and Engineering from the Royal Institute of Technology, Stockholm and University of Florida, Daniel focuses on strategic renewal, business innovation, scenarios and emerging technologies. Previously with Observer Group, he was responsible for Strategy and IT.
